Uninstall Internet Explorer 11 KB 2909921

1. In Win 7, Click Start > Control Panel > Uninstall a program. In Win 8 and 8.1 Search for ‘Uninstall a program.’

2. Click View installed Updates at the top, right of the screen.
Search for the update “Security Update for Microsoft Windows KB2909921.” Once found, right-click on the update and uninstall it.

3. Once the update is uninstalled, you will be prompted to restart your computer. Click Restart Now.
