Company Profile

Founded in 1999, eSystems' roots are grounded in helping Public Sector and private organizations better serve their stakeholders — members, citizens, providers, employers — through developing technology and business solutions that are scalable and robust. eSystems is headquartered in Princeton, NJ (USA), with offices in a number of U.S. states and Canada. eSystems is a technology and people-centric professional services firm with experience in Systems Integration, IT Solutions, and Application Support Services. We specialize in providing configurable and sustainable solutions for thriving organizations worldwide. Our employees, customers, and partners are the pillars of our success.

Join us and be an innovator. Use your customer-focused skills and business talents to take our technology and business services to new levels. If you are passionate about your work, and enjoy working in a progressive environment, then you should consider joining the eSystems team.

Job Description
Responsibilities:
- Gather and/or define requirements, often through interviews and facilitating meetings with client subject matter experts.
- Lead fit/gap sessions that map requirements to standard CBAS features and functions.
- Develop functional designs associated with the extensions.
- Plan and execute tests to verify the solution is properly configured and extended to meet requirements.
- Perform other duties such as supporting RFP responses and demos and advise management on Curam solution design.

Qualifications
Required Skills:
- At least one year of experience in business process analysis (Use Cases and/or process flows) and mapping (Gap Analysis) techniques.
- Must have one-year experience in gathering and/or defining requirements, often through interviews and facilitating meetings with client subject matter experts.
- At least 1 years' experience in ability to lead JAD sessions.
- Excellent oral and written communication skills and the ability to clearly articulate to all project members and stakeholders; must be a team player who works well with technical and non-technical resources.
- Excellent interpersonal skills and situational awareness, with the ability to tactfully represent eSystems interests in dynamic customer environments.
