

## Praxis Content Exams for Advanced Licensure Programs

The Arkansas Department of Education (ADE) requires all P-12 school professional educators to pass multiple standardized tests, including specific area content examination(s) in order to attain licensure in an endorsement program. The tables below provide data for those program completers who graduated in the 2016-17 academic years. The data below includes the aggregate pass rates, from all required content exams by advanced endorsement EPP program that had completers who took the tests. Our exit requirements are such that all candidates must pass all required state praxis tests to be considered program completers and to be eligible for licensure by the State. Therefore, all programs have a 100% pass rate, meaning that every program completer has passed the required licensure exams. The table below includes the number of retakes by completers and pass rates taking retakes into account, as well as other summary data, including state and national averages when available. Every advanced candidate who took a content exam passed on the first attempt, so there were no retakes required. The Praxis content area exam data below provides evidence that our advanced program completers have developed the necessary content knowledge of their specific licensure areas.

### 2016-17 Completers' State Required Praxis Content Exam Data
