**HELPING RELATIONS (3 hour minimum )**

Studies that provide an understanding of counseling and consultation process, including all of the following: a.) counselor and consultant characteristics and behaviors that influence helping processes including age, gender, and ethnic differences, verbal and nonverbal behaviors and personal characteristics, orientations, and skills; b.) an understanding of essential interviewing and counseling skills so that the student is able to develop a therapeutic relationship, establish appropriate counseling goals, design intervention strategies, evaluate client outcome, and successfully terminate the counselor-client relationship. Studies will also facilitate student self-awareness so that the counselor-client relationship is therapeutic and the counselor maintains appropriate professional boundaries; c.) counseling theories that provide the student with a consistent model (s) to conceptualize client presentation and select appropriate counseling interventions. Student experiences should include an examination of the historical development of counseling theories, an exploration of affective, behavior, and cognitive theories, and an opportunity to apply the theoretical material to case studies. Students will also be exposed to models of counseling that are consistent with current professional research and practice in the field so that they can begin to develop a personal model of counseling; d.) a systems perspective that provides an understanding of family and other systems theories and major models of family and related interventions. Students will be exposed to a rationale for selecting family and systems theories and major models of family and related interventions. Students will be exposed to a rationale for selecting family and systems theories as appropriate modalities for family assessment and counseling; e.) a general framework for understanding and practicing consultation. Student experiences should include an examination of the historical development of consultation, an exploration of the stages of consultation and the major models of consultation, and an opportunity to apply the theoretical material to case presentations. Students will begin to develop a personal model of consultation; f.) integration of technological strategies and applications within counseling and consultation processes; and g.) ethical and legal considerations.
