**Coursework**

The program will have both day and night classes. Some of the classes specifically for doctoral students will be taught during the day. Courses that are doctoral/master’s may be taught at night. There is a residency requirement of full-time status (9 hours) for two, consecutive full-term semesters.

**Research Design and Statistical Analysis Courses (12 hours)**. Courses in research and statistics are designed to produce an ability to frame issues and relevant research questions related to the study of crime and justice, to select the most appropriate statistical techniques, and to properly interpret the results. Students must take from the following courses:

- **CRJU 7391 Social Statistics**
  Logic, uses of statistical analysis in social science research; focus on statistical design of research projects, analysis of computer-generated output, statistical procedures and results; critique of statistical adequacy of related literature.

- **CRJU 7392 Research Methods in Criminal Justice and Criminology**
  Methods and techniques of research in the behavioral sciences. Includes an in-depth analysis of the conceptualization of research and the design of appropriate research strategies. Topics covered include experimental design, questionnaire construction, observational techniques, and qualitative research designs.

- **CRJU 8312, Secondary Data Set Management and Analysis**
  Provides an understanding of secondary data sets and how they can be used in analyses and program evaluation. Topics include data cleaning for accuracy and efficiency, recoding variables, and preparing data sets for analysis with SPSS.

- **CRJU 8314 Mixed Methodology**
  The course provides instruction in advanced methodologies of criminal justice and criminological research. Students will be exposed to a variety of qualitative techniques in addition to quantitative techniques of research methods. CRJU 7392 should be completed prior to taking this class. Enrollment in this course is restricted to students enrolled in the Ph.D. in Criminal Justice. Students from outside the CRJU Ph.D. program who wish to enroll must have permission of the Criminal Justice graduate coordinator and the professor of records.

- **CRJU 8315 Multivariate Statistics**
  This course provides instruction in advanced multivariate statistical application. CRJU 7391 should be completed prior to taking this class.
Crime and Justice Courses (12 hours). Courses include specific or advanced topics on crime and justice. Students are expected to have some knowledge of theories of criminology and criminal justice before entering the doctoral program. These courses will build on that knowledge to provide expertise in the core areas related to criminal justice (police, courts, corrections, and criminological theory). Students must select Proseminar and 9 hours from the following courses:

CRJU 8310, Proseminar
Provides a foundation for the study of crime and justice and an introduction to the role of PhDs in criminology/criminal justice. Topics include current trends in higher education, employment and career planning, and the role of academics in reducing crime. The course will also serve as an introduction to the doctoral program and writing refresher for incoming doctoral students.

CRJU 8311, Survey of Theories of Justice
Addresses the theoretical foundation of the justice system in the U.S. Topics include theories related to policing, law, corrections, and juvenile justice. This course provides a foundation for the advanced study of topics in other courses in the doctoral program.

CRJU 8313, Advanced Criminological Theory
Current works in criminological theory. Addresses updates of classical criminological theories as well as theories and research within the previous ten years.

CRJU 8321, Teaching Practicum
Prepares students to teach criminology/criminal justice courses. Covers aspects of presentation, pedagogical issues, giving and grading tests, and handling problem students. Also addressed will be expectations and activities involved in being a faculty member.

Students may also take courses from CRJU 7393, Special Topics to fulfill this requirement.

Electives and Specializations (9 hours). Students may take one of three specialization areas or may form a topical specialization with the approval of the dissertation committee and Doctoral Coordinator.

The first specialization is a criminal justice generalist. The focus of the specialization is obtaining a broad base of advanced knowledge about criminology and criminal justice. Students selecting this specialization will take all of the courses from the Crime and Justice Core and will then take 9 hours from CRJU 7393 Special Topics in Criminal Justice.

The second specialization is in crime related to the environment of neighborhoods and cities. This specialization will prepare students to conduct research on crime in
metropolitan areas, including the mobility and interaction of residents; urban design in preventing crime; and the relationship between social, physical, and economic networks and crime. Students must take 9 hours from the following courses:

**CRJU 8331, Urban Spatial Structures**
Provides an understanding of American cities, how they have changed over time, and how the spacio-temporal characteristics influence criminal behavior.

**PADM 7345, Urban Management and Community Change**
Introduces students to the study of cities as it relates to social and public policy. The course draws upon the social sciences to answer questions such as how cities have changed over time, the characteristics of cities and their populations, how cities are governed, and how policy decisions influence city growth or decline.

**CRJU 8332, Theories of Neighborhoods and Crime**
Addresses criminological theories related to the urban environment, including studies from the 1800s, social disorganization research, human/social ecology, environmental criminology, and the nature of urban crime. The goal of the course is to provide a comprehensive theoretical background upon which to conduct research on neighborhoods and crime.

**CRJU 8333, Theory and Practice of Spatial Analysis**
Advanced analysis of data related to crime in the urban environment. Topics include using Spatial Analyst, CrimeStat IV, RTM, and other spatial statistics. Theories of neighborhoods and crime will be tested using data on crime and social dynamics.

Students wishing to further focus on statistical analysis may choose to obtain a Graduate Certificate in Applied Statistics as a specialization. Six of the fifteen hours required for the certificate are core requirements for the PhD in Criminal Justice. The other required course for the certificate is STAT 7342, Introduction to SAS. The remaining six hours to satisfy this specialization and the Certificate in Applied Statistics will be decided in consultation with the Doctoral Coordinator and the Coordinator of the Applied Statistics program.

Students with special interests may also select a tailored specialization. The student will work with his or her dissertation committee and the Doctoral Coordinator in selecting courses for this specialization. These electives may be taken from any of the courses offered in the Department of Criminal Justice. Students may take MACJ courses with the permission of the professor as long as the student did not previously take the course. In limited circumstances, students may take courses outside the Department if the student receives permission from the Doctoral Coordinator.
**CRJU 8383 Research Practicum (12 hours)**
Course goals are to: 1) give students experience in writing grant proposals and obtain funding, 2) give students experience in designing research and putting research in practice, 3) give students practical experience in conducting research, and 4) build on student knowledge in analysis and research in preparation for completing their dissertation.

**CRJU 8193/8393 Dissertation (12 hours)**
Students must complete a minimum of 12 hours of dissertation. Students may enroll in dissertation hours at any time after successful completion of comprehensive exams, but must enroll in 3 hours of dissertation in the semester when the dissertation is defended. Students must enroll in at least 1 hour of dissertation each semester (or enroll in another doctoral class) to remain active in the program. The dissertation will address a particular issue in crime, criminology, or criminal justice. The dissertation must be of a content and quality worthy of publication in relevant journals or completion of a scholarly book. The dissertation will be guided by the student’s dissertation committee.
