Program Developer

The .Net Developer will be part of a development team, building and working on software systems built on top of the Microsoft .NET development stack. In this crucial role, you will be involved with the design, development, testing, and support of a suite of applications ranging from web applications, windows services, WCF services, and thick-clients which enable our employees to safely operate at peak performance. ARM works in the continuous 48 states handling claims including, but not limited to auto physical damage, inland marine cargo, dealers' open lot, property damage (commercial and homeowners) and general liability.

This position is open immediately. Consideration will be given to senior students who will graduate in May, 2016.

Main Responsibilities include:

- Design, develop, deploy and support technical solutions in a collaborative team environment.
- Support and enhance existing applications as well as develop new applications to meet organizational goals and objectives.
- Testing the system and applications.
- Ability to plan and exercise conscious control over the amount of time spent on specific activities.
- Use of clear, rational, thinking in order to communicate with non-technological end users.
- This position requires an experienced, self-motivating individual capable of performing in a fast-paced development environment, as well as interacting effectively with key customers and end users.

Requirements/Skills:

- Object oriented analysis and design
- C#, .Net, and WinForms Experience
- Database design and development (Microsoft SQL Server 2014)
- Experience with Web Services, WCF and Service Oriented Architecture a plus
- Experience with concurrent development source control and continuous integration specifically Team Foundation Server
- Experience with DevExpress or WPF a plus
- Experienced in working with third-party development companies
- Ability to take ownership of projects and be self-directed
- Ability to estimate development tasks accurately and meet agreed upon deadlines
- Ability to work at a sustained pace during critical build times
- Firm understanding of QA processes and code promotion and source control concepts
- Bachelor’s degree or equivalent in Computer Science
- Position is subject to extended work hours as business dictates
- May require light travel within a 50 - 75 miles of corporate offices
• Duties may be added, deleted or changed at any time at the discretion of management, formally or informally, either verbally or in writing.
• Must be able to exert 20 lbs. of force occasionally and 10 lbs. of force frequently.
• Position requires reaching, grasping, sitting, walking, bending, kneeling and standing.
• Must be able to hear telephone conversations.
• Must be able to read and comprehend information received via computer terminal, specification reports, memos & reports.
• Must adhere to all company and department personnel policies and procedures.
• This job description is not intended to be all-inclusive, and you will also perform other responsibilities as assigned by your immediate supervisor or other management as directed.

Salary:
Salary based on experience; begins at $40k/yr. Competitive benefits package to include health and dental insurance, paid personal time off, paid holidays, wellness program, etc.
