

Company/Organization: Apptegy

Position: Student Intern

Location: Little Rock, AR

Work Schedule: Monday - Friday, flexible around student schedules

Rate of Pay: \$10.00 - \$12.00/hr.

Website: <http://www.apptegy.com/>

Company/Organization Profile

Apptegy is an education technology startup based in Little Rock, Arkansas. In the past two years, we have rapidly scaled our services across the country, doubling the size of our team. In the coming year, we want to continue our growth, which is why we are looking for ridiculously hard-working and talented people who thrive in a fast-paced, entrepreneurial environment to join our team.

Apptegy helps school leaders share the story of every student. Amazing moments are happening in schools, but they rarely become stories that reach the community. We build technology - such as mobile apps, websites, and a publishing platform - that make it easy to share those positive stories with the world.

Job Description

The most important characteristic of an Intern at Apptegy is his or her excitement about helping to build one of the fastest growing technology companies in the state. Successful members of this team are strong communicators, technologically savvy, and are dedicated to the work.

The primary responsibility for this role is content migration: moving content from our clients' existing websites, into their new website that we've built for them. This is not glamorous work, but it's a great opportunity at an even greater place.

Qualifications

- Strong academic performance (3.5+)
- Ability to work 30-40 hours during the summer months
- Interest in technology, education, or startups

To Apply

Send a resume and cover letter to Ashley Coleman via email at ashley.coleman@apptegy.com. Be creative with your cover letter - tell us who you are, and what makes you unique!
