

# How to Download and Use the VMWare Horizon Client

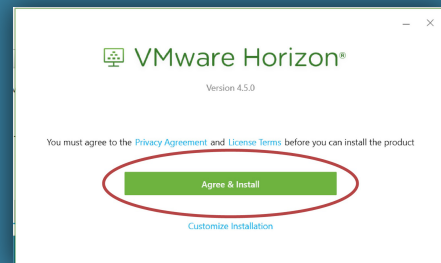

1. Go to [desktops.ualr.edu](https://desktops.ualr.edu) in your preferred browser.
2. Click "Install VMWare Horizon Client"

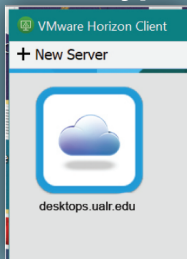

3. This will take you to VMWare's download page. From here you should locate your operating system (Windows, Mac OS, Chrome OS, etc.) and then click the corresponding "Go to Downloads" button.

4. Once you've clicked the "Go to Downloads" button you might be faced with multiple choices of a download. Download the first one you see.
5. After the download finishes, double click on the file you just downloaded and you should be met with this screen:

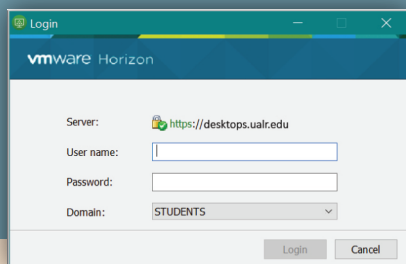

8. When you open the program you will see this screen that shows your server connections. Double click this to view your available connections and programs. If this server is not there already, click the plus sign that says "New Server" and then type in [desktops.ualr.edu](https://desktops.ualr.edu)

9. When you double click the connection server, you will be prompted to enter your credentials (the first part of your email and the password you set for it).

10. After you login, you will be able to connect to your available desktops and or programs to use.

6. Click "Agree & Install" and the program will do the rest. Your computer might prompt you to allow this program to install, click yes.
7. After it installs, you will need to restart your computer. Once you have restarted your computer, you should see the VMWare Horizon Client shortcut on your desktop. Click on this shortcut to open the program.
