Re: Core Implementation Policy

The Core Council discovered that in the move from the previous core to the UALR Standard Core and College Core that there was ambiguity surrounding the date of implementation. We have approved the following policy regarding the implementation of the UALR Standard Core and College Core:

This policy applies to core courses for the UALR college core and standard core. The UALR college core and standard core went into effect on Jan. 2015.

Therefore only the courses approved for the UALR college core and standard core (implemented in January 2015) satisfy the core requirements. Courses approved after the implementation date of the UALR college core and standard core (January 2015) are approved for the next academic year following the semester of approval.
