

Workday Student Information for Faculty - January 27, 2023

- **What is Workday Student?**
 - Workday Student is a student-centered comprehensive information system that **will replace** Banner, Boss, and DegreeWorks as it is deployed over the AY 2024-2025 (different pieces will go live at different times). This will allow a cloud-based, modern system across the entire UA System of institutions.
- **Why are we doing this now?**
 - Many UA System campuses have legacy systems that are at their end of life. By bringing our institutions together onto a common student information platform, we can realize better alignment of practices, in a more secure, mobile-friendly environment.
- **Will Workday Student change how all of us at UA Little Rock do our work?**
 - Yes
 - Workday Student will change how faculty, students, and staff do their daily tasks with respect to admissions, financial aid obtained, advising, scheduling, and more.
 - Please appreciate the fact that our university has been very intentional in how we have resourced our people and better responses from the System Office with Workday Student. Why? We have heard campus stakeholders loud and clear and are determined to do everything possible to have a smoother rollout than we did for the (totally) different Workday HCM & Finance system.
- **Who at our university is most-closely involved with this implementation?**
 - A core university team and some speciality data-related groups (over 40 people) comprised of: IT Services, Records and Registration, Advisors, deans' offices, provost's office, Admissions, Financial Aid and Scholarships, Student Accounts, and eLearning has been working diligently to meet implementation deadlines on business processes and data conversions for the UA System.
 - This involves daily meetings for some, weekly meetings for a slightly larger group, and monthly meetings for the entire university team.
 - To meet the need for greater management and success, the number of UA Little Rock employees heavily involved will increase to roughly 70 people by spring break this March.

- Additionally, the Provost's Office is putting together a voluntary faculty advisory group to provide input on the faculty user experience. If you are interested in serving on this committee, please email Erin Finzer.
- **How are we considering the importance of securing our university's information?**
 - Unlike Banner, Workday Student will be structured around security roles that are based on individuals. That means that the generic departmental campus accounts that are currently in place will be phased out.
 - Greater security with this technology will provide a more robust user experience for mobile-friendly services covering admissions, accessing grades, handling financial aid, student accounts, and registering for classes.
- **What are we doing to communicate the details of this major project?**
 - To date, we have provided Town Hall sessions to the Faculty and Staff Senates, detailed briefings to the Provost's Leadership Council, updates to the chairs and directors, and via the creation of the university's "[source of truth](#)" [website for Workday Student at UA Little Rock](#).
 - The Provost's Office and IT Services will be offering two additional information sessions for faculty in February and a Business Office Brown-Bag (BOB!) about Workday Student on March 1. You can register for these sessions, which will be held via zoom (no, they will not be recorded), through the Provost's Weekly Newsletter.
 - Ongoing information on Workday Student progress will be included, as indicated, in the weekly Provost Newsletter & the [Provost Office website](#).
- Additional information is available at <https://ualr.edu/workday/workday-student/> .

Workday Student

Transforming the Student Experience

Workday Student will be the primary student administration system used to support the processes and services associated with a student's progression from admission through graduation, including student records, registration, course rosters, grading, advising, and transcripts. Workday Student will be used by all faculty and students and is easily accessible via a mobile app for Android and iOS. [Learn more about some of the key benefits.](#)

The Student modules will be built into the same Workday you use today – no new login is needed for faculty and staff. Workday unifies Financial Management, Human Resources, Planning, and Student data processes into a single platform, creating instantaneous access to data that spans multiple disciplines.
