Vardelle Parham Geology Center
3815 West Roosevelt Road
Little Rock, AR 72204

Dear Students:

Team, you are needed right away! Jacksonville, located just northeast of Little Rock is in an environmental crisis. Many of its water sources have become polluted from industry and traffic. Its farmland has eroded and the air has become increasingly dangerous to breathe. We need your help to assist Jacksonville in designing a park- called Preservation Park- to preserve its natural resources. You have 3 weeks to learn all you can about natural resources, soil, and conservation. Get busy right away.

Sincerely,

Arkansas Geological Survey
