

- You are a newly hired employee for Arkansas Entergy.
- Your first assignment after completing the company's orientation program is to work as part of a team that has been asked to design a _____ in downtown Little Rock.
- This project is backed by both federal and state funding.
- Your role is to ensure that power (electricity) requirements are planned appropriately and are adequate for the new _____.
- You must also design a comprehensive backup plan for the building. What will happen in case of power outage?
- Your training in college stressed building management and planning, not electricity.
