### **Report of the Program Review Subcommittee**

#### **Other Business:**

The chair met this week with Rosalie Cheatham to discuss issues and ideas related to the program review process. How to tie the program review process, undergraduate and graduate programs, to appropriate accrediting bodies is an issue. The chair asked the council for feedback regarding this issue.

#### **Dean’s Report:**

Graduate enrollment numbers for the spring 2006 term reached a record high—2066

The dean asked the council to review the draft for the job description for the Associate Dean for Research and Graduate Studies. Comments should be sent directly to him via email. The dean is forming a search committee.

The Advance Comment Form will follow the routing process that is stated on the printed form in order for all areas to have an opportunity to review all comments related to a new graduate program.
