### QUESTIONS AND ANSWERS

Responses are below in **RED**

1. The price forms are identical for both FB-25-031 & FB-25-033. Can you please provide a revised price sheet for FB-25-033 that accurately reflects the Bid request for just the single Backup transmitter? This includes the specification checklist tab and pricing tabs. **See Addendum and Amended Price Sheet for FB-25-033.**
2. Within the specifications, we cannot find any information regarding antenna(s) and/or cabling; however, in the price form, there is a space for inputting the price for these items. Please clarify if antennas and cabling are required. **Antennas and cabling are not required. Included on the original price sheet as a generic list for pricing consideration, if it was necessary.**
3. Within the specifications, we cannot find any information regarding details about the on-site installation of transmitters; however, in the price form, there is a space for inputting the price for installation. Please clarify if the successful bidder is responsible for installation, and if so, please provide very detailed information about each transmitter site to include scope of work required, floor plan, ceiling height, position and dimensions of existing transmitter(s), and position/dimensions of all other equipment. Pictures and videos of the interior and exterior of each site would also be beneficial. Alternately, please let us know a date and time when a site visit would be possible prior to bid submittal so that we may gather needed information to put together an accurate installation quote. **Installation is not necessary; only delivery is needed. Installation has been removed from the amended price sheet.**
4. Within the specifications, we cannot find any information regarding details about on-site training; however, in the price form, there is a space for inputting the price for on-site training. Please clarify and provide details if this is a requirement. **Not required. Included on the original price sheet as a generic list for pricing consideration, if it was necessary.**

5. Within the specifications, we cannot find any information regarding details about warranty requirements; however, in the price form, there is space for inputting the price for years 3-5 extended warranty. Please clarify the requirement. **Not required. Included on the original price sheet as a generic list for pricing consideration, if it was necessary.**
6. If no subcontractors are to be used in this tender, is the "Contract & Grant Disclosure & Certification Form" required to be completed and submitted with the response? **Yes, all suppliers and their subcontracts must complete the Contract and Grant Disclosure Certification Form when a purchase exceeds Arkansas's competitive bid threshold of \$20,000.**
